Bio Design | Vol.2 | No.2 | June 30, 2014

MINI REVIEW

- | | | |
|----|-----------------------------------------------------------------------------------|----------------------------------------------------------------------|
| 39 | Substrate recognition and catalytic mechanism of 5'-3' exoribonucleases | Jeong Ho Chang and Liang Tong |
| 47 | Structure-based drug discovery using NMR spectroscopy | Ji-Hye Yun and Weontae Lee |
| 55 | Neutralizing Interaction of Therapeutic Antibodies against TNF Superfamily | Jee Un Lee, Ji Young Son, Woori Shin, Ki-Young Yoo and Yong-Seok Heo |

TECHNICAL REPORT

- | | | |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| 62 | Improvement of crystal quality for X-ray diffraction of the problematic redox protein complex, thioredoxin and thioredoxin-interacting protein | Jungwon Hwang and Myung Hee Kim |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
